

### **White Peach and Cardamom Fizzy**

2 cups white peach nectar  
One teaspoon green cardamom  **pods**  
2 cups club soda

Crush the cardamom pods to release the seeds inside (see photo below). Discard the outer pods and add the seeds to a plastic or glass container. Pour the peach nectar over the seeds, cover the container and leave in the refrigerator for about 4 hours. Strain the seeds out with a fine mesh strainer.

Place ice cubes in a 12 ounce rocks glass and fill halfway with the infused nectar. Pour in an equal amount of club soda and stir gently.

**Yield: about 4 drinks**
